Electronic Navigation Equipment
Upgrade

April 2011

Change History

20/03/07	V 0.11	Reallocate power distribution
20/03/07	V 0.12	Detail wiring for NMEA Junction Box
24/03/07	V 0.13	Corrections to NMEA Junction Box colours Updated NMEA Mux Power Distribution to include indirect supplies Detail Wiring for Seataalk RS232 Box Remove PC from Seataalk RS232 Box (only required for Raytech Navigation software) Gyro output 10Hz at 4800 baud AIS will be fed into Port 1 of the NMEA Mux (Gyro to Port 2) to ensure high speed NMEA output to the Garmin 3005C
19/04/07	V 0.14	Include DIN Socket (at Navigation Table) connection to NMEA Mux output GPSMAP 3005C connected to "GPS" power at the distribution panel Re do GPSMAP 3005C Wiring to accomodate restriction of GPS NMEA Source being input to Port 3
28/06/07	V0.15	Edited to show final configuration (for now!)
11/02/2008	V0.16	Update to reflect dual Garmin Chartplotter Configuration
		Installation of Engine Hour Meter
01/03/08	V0.17	Complete revamp following problems interfacing the Raymarine GPS to networked Garmin plotters. GPS 17HVS is now the GPS source.
	V0.18/V0.19	Make adjustments to reflect current wiring.
	V0.20	Reconfigure NMEA Junction Box
	V0.21	Adjustments to NMEA wiring and the DIN connection
12/03/08	V0.22	Change GPS feed to the RN300 to prevent No Fix conflict with Seataalk
01/04/08	V0.23	Readjust Power distribution to allow low power operation
01/04/09	V0.24	Add NMEA Buffer to resolve problems with loss of GPS signal
01/08/09	V0.25	Upgrade 3005C to 3010C – modify port connections (3010C has an additional port) and upgrade fuse. Remove NMEA GPS feed to the RN300 – GPS will feed via the Seataalk RS232 box
01/04/11	V0.26	Added 5 volt DC supply. Provide wireless Bluetooth connections CALERO A (Full NMEA), CALERO B (GPS NMEA) and Belkin C0 (Audio)

Key Components

Garmin Marine Network

- Garmin GMR18 Radar (4kw Radar, MARPA)
- Garmin GPSMAP 3205 Radar Display and Chartplotter (at binnacle)
- Garmin GPSMAP 3010C Radar Display and Chartplotter (at navigation table)
- Garmin GMS 10 Network Port Expander

Raymarine Seataalk

- Raymarine RN300 plotter as Seataalk Repeater
- Raymarine ST60 (Wind, Depth and Speed)
- Raymarine 5000plus Autopilot
- Raymarine PC/Seataalk/NMEA Interface Box

KVH

- KVH Autocomp 1000S Fast Heading Sensor

Radio/VHF

- Simrad RD68 GMDSS DSC VHF Radio
- Pioneer LW/MW/FM CD Player with Ipod/MP3/WMA
- EasyAIS (2 Channel Receiver)
- EasyAIS Aerial Splitter

NASA

- NASA PC Navtex PRO

Actisense

- Actisense NDC-2-C NMEA Data Combiner
- Actisense NBF-2 NMEA Buffer

Bluetooth

- LM Technologies LM058 Serial Wireless Adaptors
- Belkin Audio Adaptor

Version 26 01/04/11

Network Interconnectivity

Version 26 01/04/11

Seataalk Configuration

Garmin Marine Network

NMEA Configuration – Data Flow

NMEA Configuration – Line Speeds

Power – Breaker Panel

Version 26 01/04/11

Radar – GMR18

Power – Breaker Panel

16A
3A
7A
7A

10A The following are powered indirectly to the
Breaker Panel:
10A • FM/RADIO – Permanent connection
10A • Heating
16A • Anchor Windlass Relay
4A • Navtex
4A • Gas Alarm
10A
16A

Fuses

Version 26 01/04/11

To operate in reduced power mode the following options are available:

- | | |
|---------------|--|
| Mode 1 | "Radio" only – will provide VHF with GPS position for GMDSS positioning |
| Mode 2 | "Instruments" only – will provide basic Raymarine navigation aids only with no GPS position |
| Mode 3 | "Instruments" + "Radio" will provide all the above plus RN300 and Autopilot |
| Mode 4 | "Instruments" + "Radio" + "GPS" will provide all the above plus Garmin chart plotting, Auto pilot and AIS |
| Mode 5 | "Instruments" + "Radio" + "GPS" + "Radar" will provide all the above plus Radar and MARPA |

Under normal conditions the system should be in Mode 4 with Mode 5 selected when Radar is required.

Garmin 3205/3005C Power/Cable Wiring

Power/Data Cable Wiring

The following pages contain several wiring diagrams. The first diagram on the next page is a simple diagram showing the GPSMAP 3005C MFD using the 18-pin Power/Data wiring harness and the GPS 17. If two or more GPSMAP 3005C/3006C/3010C units are installed and networked, only one GPS 17 antenna needs to be installed. Next are wiring diagram examples showing the GPSMAP 3005C using the 18-pin Power/Data wiring harness interfacing with a variety of different equipment. Refer to the wiring diagram that best suits your needs. For third-party devices, be sure to refer to the wiring guidelines included with that equipment. Use 22 AWG (18 AWG for the Red and Black wires), shielded, twisted-pair wiring for extended runs of wire. Solder all connections and seal the connection with heat shrink tubing. If networking two or more MFDs, NMEA devices only need to be attached to one MFD on the network. A pinout of the cable is shown below.

Power/Data Cable Input/Output Ports

The GPSMAP 3005C Power/Data cable has three I/O (Input/Output) ports.

Port 1—communicates with other NMEA-compliant devices, such as VHF radios, NMEA instruments, autopilots, PCs, or Garmin Sounder Modules. You can input one NMEA device to each port, and output in parallel to three NMEA devices per port.

Port 2—is reserved for use with Garmin Sounder Modules or NMEA devices.

Port 3—is reserved for use with the Garmin GPS 17 GPS/WAAS antenna.

The following formats are supported for connection of external devices: Garmin proprietary Sonar Module and NMEA 0183 version 3.01. The following are the sentences for NMEA 0183, version 3.01 and later output:

Approved Sentences—GPBWC, GPRMC, GPGGA, GPGSA, GPGSV, GPGLL, GPBOD, GPRMB, GPRTE, GPVTG, GPWPL, and GPXTE.
Garmin Proprietary Sentences—PGRME, PGRMM, and PGRMZ.

The unit also includes NMEA input with support for the WPL sentence, DSC, and sonar NMEA input with support for the DPT, MTW, VHW, HDG, and HDM sentences. The unit interface must be set to NMEA In/NMEA Out.

Documentation concerning NMEA & RTCM formats and sentences are available for purchase from:

Garmin 3010C Power/Cable Wiring

Power/Data Cable Wiring

The following pages contain several wiring diagrams. The first diagram on the next page is a simple diagram showing the GPSMAP 3000 series chartplotter using the 18-pin Power/data cable and the GPS 17x. If two or more GPSMAP 3000, 4000, or 5000 series chartplotters are installed and networked, only one GPS 17x antenna needs to be installed. Next are wiring diagram examples showing the GPSMAP 3000 using the 18-pin Power/Data wiring harness interfacing with a variety of different equipment. Refer to the wiring diagram that best suits your needs. For third-party devices, refer to the wiring guidelines included with that equipment. Use 22 AWG (18 AWG for the Red and Black wires), shielded, twisted-pair wiring for extended runs of wire. Solder all connections and seal the connection with heat shrink tubing. **If networking two or more chartplotters, the GPS 17x and NMEA input devices should only be attached to one chartplotter on the network.** A pinout of the cable is shown below.

Power/Data Cable Input/Output Ports

The GPSMAP 3000 series Power/data cable has four I/O (Input/Output) ports.

Ports 1 and 2—communicate with other NMEA-compliant devices, such as VHF radios, NMEA instruments, autopilots, or PCs (Port 1 only). You can input **one** NMEA device to each port, and output in parallel to **three** NMEA devices per port.

Port 3—is reserved for use with Garmin sounder modules.

Port 4—is reserved for use with the Garmin GPS 17x GPS antenna.

The following formats are supported for connection of external devices: Garmin proprietary sonar module and NMEA 0183 version 3.01. The following are the sentences for NMEA 0183, version 3.01 and later output:

Approved sentences—GPBWC, GPRMC, GPGGA, GPGSA, GPGSV, GPGLL, GPBOD, GPRMB, GPRTE, GPVTG, GPWPL, and GPXTE

Garmin proprietary sentences—PGRME, PGRMM, PGRMZ, and PSLIB

The unit also includes NMEA input with support for the WPL sentence, DSC, and sonar NMEA input with support for the DPT (Depth) or DBT, MTW (Water Temp), and VHW (Water, Speed, and Heading) sentences. The unit interface must be set to NMEA In/NMEA Out.

Documentation concerning NMEA and RTCM formats and sentences are available for purchase from:

Power – Specification

GPSMAP 3205	12W max
GPSMAP 3010	25W max
GMS 10	2.75W max
Radar – GMR18	33.5W max
SeaTalk Instruments (Windx2/Depth/Speed) RN300 Autopilot ST5000plus KVH Autocomp	40W max (<13 instruments) 3W to 6W with full backlighting 0.7 – 2.4W (Standby) 6 -18W (Auto) The power to the SeaTalk Bus must be provided by the Autopilot Head which has its own power socket – 12 A fuse recommended) 1.56W ??? max (powered from the SeaTalk Bus)
NMEA/Seataalk Interface (???)	Low
Aerial Splitter – EasySplit	Low
RD68 Fixed DSC VHF Radio FM/AM Radio/CD Player	5.5 Amps Low (on standby) 120W (full volume)
Navtex	Low
Cigarette Lighter (for PC)	???
EasyAis	Low
NMEA Mux	26-30mA
Engine Hours Meter	Low
Dual watch Gas Alarm	???
